Question 1: Let's build a calculator.

Write a program that takes the following inputs

1. Two numbers
2. One operator (+, -, *, /, or %)

The program then should perform the operation on two numbers and should print an answer.

Question 2: Attendance checker

A student will not be allowed to sit in an exam if his/her attendance is less than 75%.

Write a program that takes the following input from a user

- Number of classes held
- Number of classes attended.

And prints

- percentage of class attended
- If a student is allowed to sit in the exam or not.
